PS Plates & Duplo S

A comprehensive range of flush plates compatible with concealed installation systems for modern bathrooms

Roca

A World of Design Options

The PS range of flush plates offers an inspiring array of design possibilities, combining innovation and style to suit all tastes. Featuring the latest cable technology, these sleek, compact flush plates are available in a variety of finishes and styles to effortlessly enhance any bathroom décor.

The perfect complement to PS flush plates, Duplo S installation systems offer unparalleled versatility and innovation, designed to suit a wide range of bathroom configurations. Whether renovating or building from scratch, these systems ensure seamless installation and easy maintenance, providing the flexibility to create a bathroom that is both visually stunning and highly efficient.

Together, the PS range and Duplo S systems take bathroom design to new heights, combining refined aesthetics with advanced functionality. These solutions embody the essence of exceptional design, offering the adaptability and performance needed to create spaces that inspire and endure.

PS Plates

Hidden gems for bathroom bliss

PS flush plates enable the creation of a bespoke bathroom look with versatile and stylish solutions to meet a wide range of customer requirements. Each version combines advanced technology with aesthetic appeal, offering a stunning range of finishes and a variety of styles. The electronic models also feature touch-free operation and customisable lighting.

PS Finishes

Unlocking Inspiration

The PS collection of flush plates has been designed to inspire and allow the creation of highly personalised bathroom spaces. It offers endless possibilities with an impressive range of finishes, including PVD, vibrant colours, glass, concrete, ceramics, slate and wood.

Polished Elegance

PS flush plates are available in luxurious PVD finishes, including a titanium black, rose gold, brushed titanium black, brushed brass and stainless steel. These elegant and durable finishes add a touch of sophistication to any bathroom.

The Glow of Elegance

A versatile and timeless choice, the subtle warmth of brushed brass adds a touch of sophistication. Suitable for any bathroom style, this finish creates understated yet striking focal points.

Material Expressions

For an elevated solution that goes beyond the conventional, PS presents an enticing selection of materials, that includes ceramics, concrete, slate and wood. These materials offer a wealth of inspiration, each with its own distinctive appeal and character, to suit any bathroom design and allow users to create spaces that reflect their unique taste and personality.

Nature’s raw beauty unleashed

Often associated with other areas of the home, slate can be equally stunning and functional in the bathroom, bringing an organic and sensual appeal to the space.

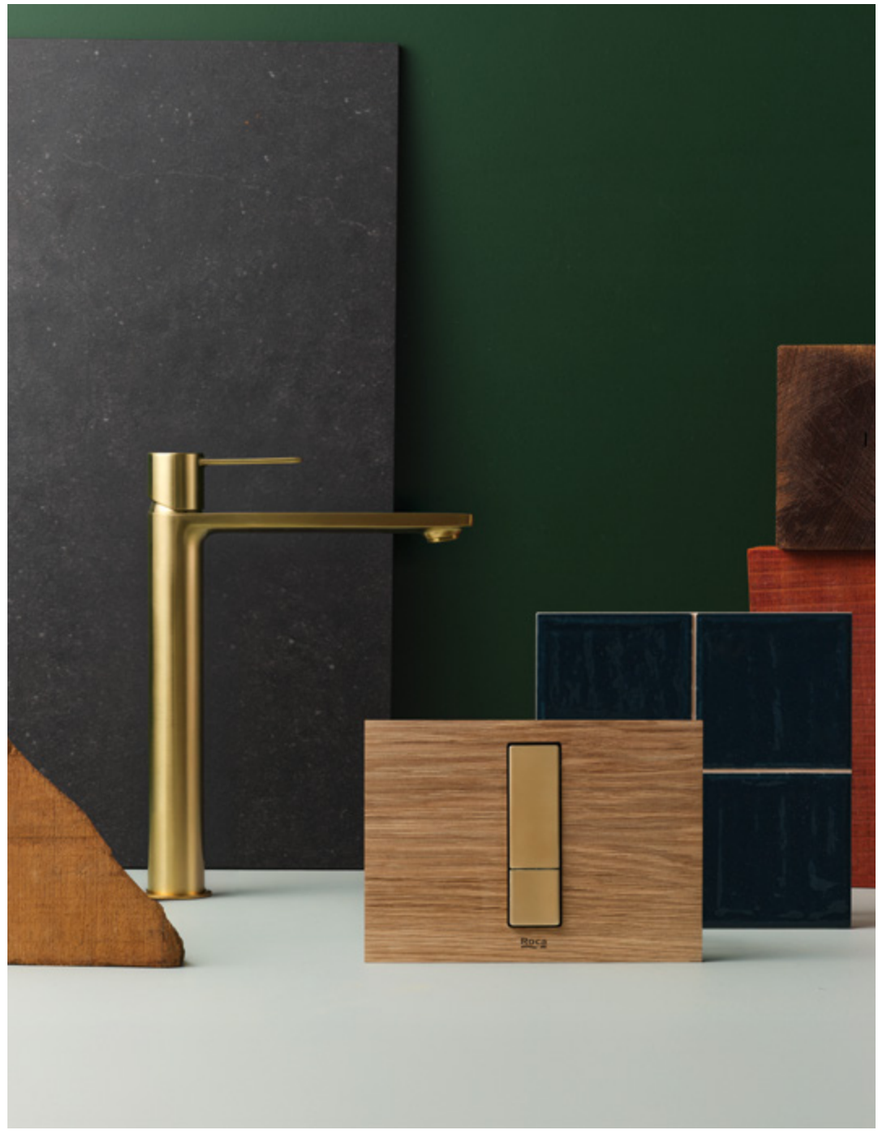

Ceramic mastery and technological precision

A transformative blend of elegance and innovation that adds a distinctive touch to any bathroom, whether in sophisticated black or fresh white.

An infusion of warmth and comfort

Bring the essence of nature indoors with the rich tones of oak to create a sense of calm and harmony.

Industrial style bathroom design

Concrete flush plates integrate seamlessly with concrete walls to create a cohesive bathroom aesthetic.

Colourful Harmony

Good design thrives on attention to detail, and colour is key to creating a bathroom that feels both balanced and vibrant. The PS collection incorporates the bold, playful hues of the Nu faucet collection — honey yellow, mint green and cobalt blue — adding a personal touch that encourages creative and expressive design.

PS Designs

Shape That Space

The PS collection includes mechanical and electronic flush plates in seven distinct designs to accommodate various tastes: from a minimalist design to a soft, playful touch or discreet functionality, there is a design to meet every whim and desire.

Geometric Simplicity

PS1. A modern, geometric framed design with large push buttons, emphasising simplicity and functionality. (see p 50)

PS2. A design stripe uniting two flush buttons to accentuate their contrasting sizes. (see p 50)

PS4. A sleek, vertical design that is discreet and versatile. (see p 51)

Circular Elegance

PS3. A stylish design with simple round buttons, one large and one small, that embraces softness and fluidity while offering both elegance and functionality. (see p 50)

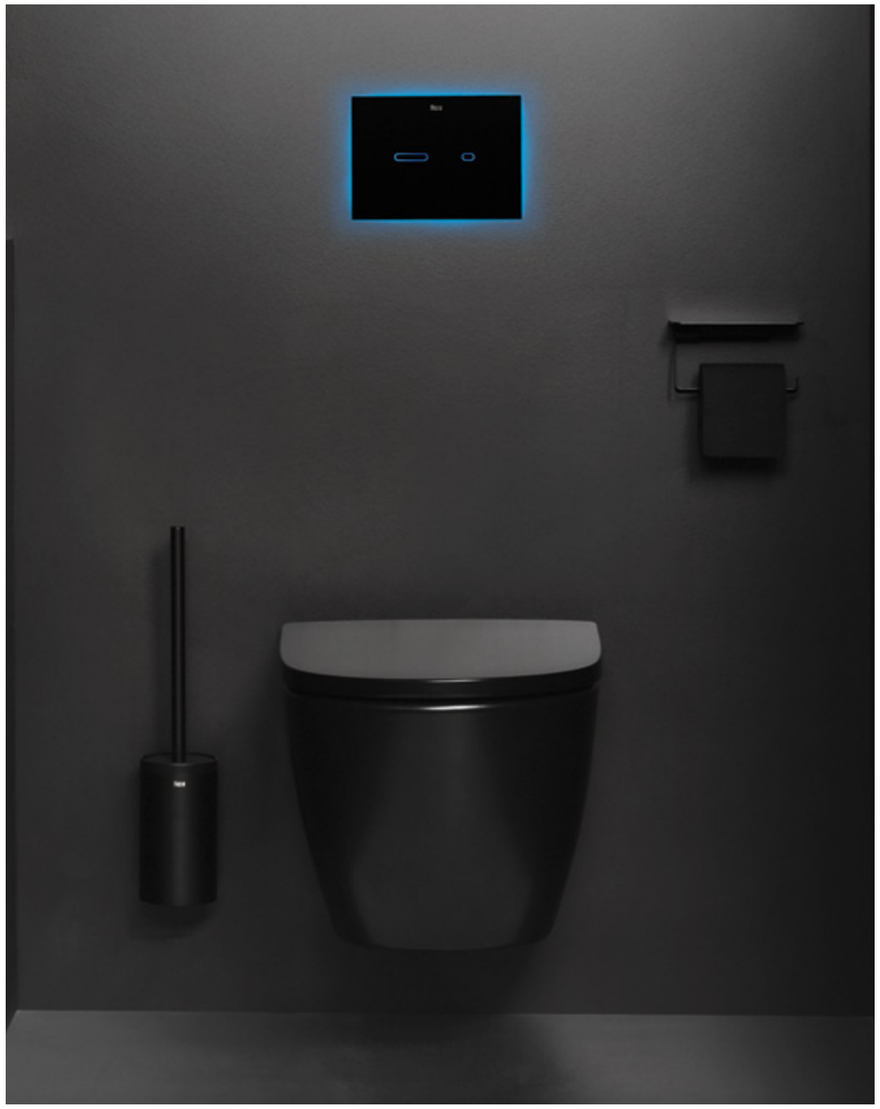

PS5. Introduces a playful element to the circular motif, adding a unique touch to the bathroom aesthetic. (see p 51)

Electronic Design

EPS1. The ultimate in convenience and hygiene, the EPS1 electronic plate has a slim profile and provides touchless operation, automatic flushing, and a hygiene flush function. Seven different lighting colour options offer increased versatility and visual appeal. It also offers Roca Connect connectivity and a battery-powered version.

Vertical Precision

PS Urinal. Featuring a frameless, elegant design, the PS4 Dual urinal plates are specifically designed for use with Duplo S urinals and their flushing systems. Available in both mechanical and electronic versions, these plates come in a selection of standard finishes — white, matt white, matt black, chrome and stainless steel — and premium finishes — white, black and anthracite glass — for a more contemporary, sophisticated look.

PS Customisation

Endless Possibilities

Design a bathroom to reflect an individual style, right down to the flush plate with this simple and intuitive customisation option.

Make It Unique

Personalisation is at the heart of modern bathroom design. PS3 Dual Combi and PS4 Dual Combi flush plates offer endless possibilities to create a truly unique space.

1. Select a design: Add to the bathroom décor with one of two flush plate designs.

2. Choose a panel finish: Discover the wide range of finishes to add a distinctive look and feel.

3. Add a button colour: Add the finishing touch with the perfect colour for the chosen flush plate.

4. Personalised result: A completely unique flush plate to suit any personal taste.

Seamless Style

Roca's flat solutions offer a new approach to bathroom aesthetics, with flush plates that seamlessly blend into walls to create a unique and integrated aesthetic. This solution is compatible with PS2 and PS3.

Roca

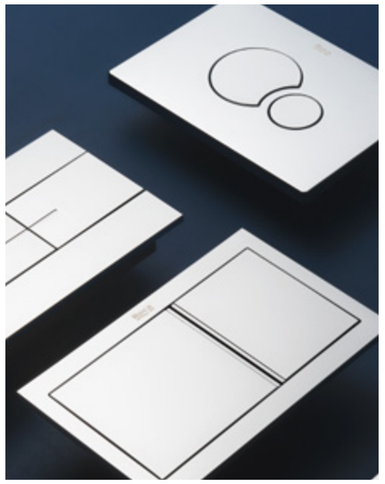

PS Features

Small Flush Plates

New range of smaller flush plates available in a variety of textures, colours and materials.

Modern Choices

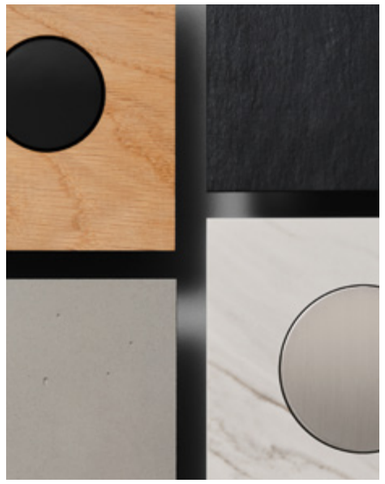

A range of design options.

Electronic Version

Electronic version with touchless automatic flush, seven light colours, hygiene flush and Roca Connect connectivity.

Expanded Finishes

Wide range of finishes, including luxurious PVD colours, vibrant hues from the Nu collection, and an enticing selection of material finishes.

Cable Technology

More and varied design possibilities, easier installation and an actuating force below 20N.

Urinal Solution

Including both mechanical and electronic plates, the electronic version is available in mains-powered and battery-powered options. Possibility to upgrade from a mechanical to an electronic plate.

Duplo S

Duplo S is a top-of-the-range installation system with small and slim plates, available in a variety of new finishes and colours, totally compatible with all Roca toilets. This compact, silent and water-saving solution uses cable technology to guarantee a very soft touch and easy plate assembly without the need for tools.

Redefining Bathroom Innovation

The Duplo S system, developed by Sanit, is an example of the integration of advanced technologies. This system reflects Roca's global expertise and commitment to delivering exceptional quality and performance. Beyond product development, this Competence Center drives industry transformation by anticipating market needs and fostering cross-functional collaboration, ensuring that Roca remains at the forefront of innovation, sustainability and technology.

Fitting all types of walls and available for toilets, bidets, urinals and basins, the Duplo S system offers the adaptability to create a bathroom that is not only visually stunning but also remarkably efficient. With adjustable flush volumes and innovative features including automatic flushing and backlighting, the system enhances both functionality and water conservation, setting a new standard for modern bathroom design.

Advanced technology for efficiency and style

Duplo S Features

Versatile Solution

A highly adaptable installation that guarantees seamless compatibility with all Roca toilets, including smart toilets. Duplo S is equipped to accommodate various installation configurations.

Includes a range of frames for urinals, bidets and washbasins.

Quick and Easy Installation

Designed for convenience and maximum efficiency, Duplo S combines cable technology with practical adjustment features for increased flexibility and installability.

Cable technology guarantees fast plate assembly without tools. Other features to simplify the process include an easy height adjustment mechanism with brake system for precise adaptability, easy adjustment of the position and angle of the outlet pipe and easy adjustment of the feet using a rotation system.

Efficient Water Management

Advanced water-saving technology, designed to provide precise control over flushing volumes.

Flush volume can be easily adjusted to individual needs with 6/3l, 4.5/3l and 4/2l options.

Maximum Comfort

Soft touch made possible by innovative cable technology.

Quiet in operation, less than 20 DBA, meeting EU standards

01 Tool-free wall mounting fixations
Quick and easy adjustments. Compatible with corner installations.

02 Space-saving design
Compact depth versions to optimise smaller spaces.

03 Easy maintenance water inlet system
Two-piece angle valve with internal disassembly option and no tools required.

04 Practical opening revisions
Service openings with plasterboard hole template and easy-to-cut material.

05 Cable technology
Fast plate assembly without tools. Soft touch operation (less than 20N).

06 Water-saving
Dual flush mechanism with three water flow settings: 6/3, 4.5/3 and 4/2 litres.

07 Silent solution
Filling mechanism that reduces noise levels with less than 20 dB (Class I).

08 Powder-coated steel frame
Provides protection against corrosion.

09 Smart all-in-one solution
Pre-assembled components for easy installation of the In-Wash® range

10 Easy height adjustment
Height can be adjusted via brake system for simple one-person installation

11 Adaptable to any site
Adjustable outlet elbow pipe and routable foot base. Compatible with wood, metal and standard profile systems.

12 Extended range
Includes a range of frames for urinals, bidets and washbasins for all wall-hung bathroom products, as well as low height concealed cistern solutions

Our contribution to a more sustainable future for all

Our commitment to sustainable growth and development prioritises the wellbeing of people and the planet. This commitment is reflected in our efforts to foster strong societal relationships and support communities, as well as initiatives in decarbonisation, eco-design and circularity. We create high-quality, durable products by considering their entire lifecycle, from carefully selected materials to optimised transport methods. Our aim is to combine the needs of society with environmental responsibility to deliver solutions that benefit everyone.

↓50% CO_2 emissions*

↓57% Energy intensity*

31,500 Photovoltaic panels**

15,000 MWh Self-generated renewable energy per year**

↓53% Water consumption*

↓59% Water usage intensity*

↓50% Generated waste*

↓59% Waste generation intensity*

69% Recycled or reused waste**

Products

Dual-flush mechanism. Dual flush cisterns offer adaptable water use, ensuring efficiency for different flushing requirements while reducing overall water consumption.

Smart shower. Smart shower solutions allow programmable shower options and monitor water usage to encourage responsible and sustainable use.

W+W. Integrating the washbasin and toilet into a single piece, this internationally acclaimed design reuses water from the washbasin to flush the toilet.

Certificates. Many of our products are made from FSC®–certified wood.

Our water-using products carry the Unified Water Label water efficiency labelling system to help consumers understand the water and energy use in these products.

Technologies

Cold Start. Cold Start technology prevents unnecessary boiler activation by defaulting to a cold water start position. This innovation saves energy and reduces emissions released into the atmosphere.

Aerators. Faucet spouts with aerators that mix air with water help to reduce the flow rate while maintaining the same functionality and comfort.

Thermostatic faucets and fittings. Quick Reaction® technology delivers desired temperatures rapidly and an eco-stop button contribute to water conservation in showers.

Materials

Stonex®. An improved formula for Stonex® baths uses recycled PET bottles, reducing the carbon footprint by up to 25%.

Initiatives

Pioneering sustainable ceramics
Our recent partnership with Keramischer Ofenbau marks a significant step towards sustainability as we launched the world's first electric tunnel kiln for the production of sanitaryware. This pioneering initiative positions us as a global leader in the operation of a net-zero sanitaryware manufacturing facility, setting a new standard for the industry.

Through collaboration and innovative technology, we aim to lead the way to a sustainable future for the ceramics industry.

We Are Water

For over a decade, the We Are Water Foundation has promoted global hygiene and sustainable water management, improving access to clean water and sanitation in disadvantaged regions while raising awareness and providing training.

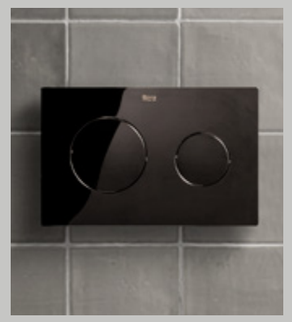

Commitment

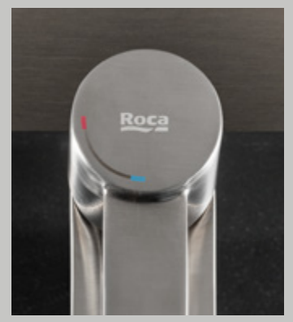

Sustainable and Ethical Commitment
Roca Group is committed to implementing responsible business practices that prioritise environmental protection, social responsibility and ethical behaviour.

EcoVadis Platinum Medal recognises Roca Group's outstanding sustainability performance.

As a proud member of the **United Nations Global Compact**, sustainability forms an integral part of our commitment and we work in line with the targets of the **Sustainable Development Goals**.
